

## Database of NHS Pharmacists

Pharmacists make a difference to the lives of their patients through an expert knowledge of medicines and health. Pharmacists provide unique expertise and essential healthcare advice to ensure medicines are being used safely and efficiently. They're an integral part of our healthcare system.

Hospital Pharmacists are an essential part of a secondary care team. They provide, prepare and dispense medicines to treated patients.

Our Database of NHS Pharmacists provides a comprehensive source of information and insights within the UK and Ireland.

All information within the database is regularly verified and updated by our specialist team of product researchers; giving you the quality, targeted data you need and the reassurance that you will be GDPR compliant.

**Data can be segmented to enable targeting of campaigns by:**

- Department
- Job Responsibility
- Organisation Type
- Specialty

### Database Contents 21,598

For the most up-to-date counts or to speak to us about our Campaign Packages, please contact your account manager direct or use the contact us form on this site.

**Please note:** It is common for a healthcare professional to have more than one responsibility. Therefore, there may be fewer named individuals on the database than there are areas of responsibility indicated above. Counts provided will be deduped to provide 'unique' contacts. Number of contacts may vary during our research cycle due to the fast-paced rate of change of organisations changes within UK healthcare. Counts correct at time of publishing **September 2024**.
